CHART - IT

Patient charting was never easier or more versatile than with Chart-It from American Dental Technologies. This easy-to-learn, intuitive program is designed to work the way you practice dentistry. What's more, you can enter data with a hands-free voice activation system, electronic probes, light pen, keyboard or mouse. Chart-It offers a complete range of features:

FEATURES & REPORTS

RESTORATIVE CHARTING
Decay, defective, restored, implants, missing teeth and much more are represented in full color graphics.

PERIODONTAL CHARTING
Free gingival margin, mucogingival junction, mobility, pocket depth, furcation, bleeding, and suppuration.

PERIODONTAL STATISTICS REPORT
A full numeric report lists everything on the periodontal report.

ATTACHMENT COMPARISON REPORT
The patient's progress can be compared between visits.

TREATMENT PLANS & PREDETERMINATION
Up to 9 plans are available for each patient with ADA codes and fee estimation for stand alone use or may be sent to the practice management.

NOTES
Tooth notes and general chronological notes are available on the periodontal and restorative charts.

HISTORY
Complete patient history of all information collected is available at any time.

INTEGRATION

Chart-It is designed to integrate fully with many major dental practice management systems.

INTRAORAL CAMERA
Switch directly to Capture-It Plus to capture or review image.

DIGITAL X-RAY
Switch directly into the Xamine-it digital x-ray software in one simple step.

TYPES OF DATA ENTRY
Chart-It allows more options of data entry than any other system.

VOICE ACTIVATION
This allows hands-free data entry into Chart-It without requiring an assistant to record data.
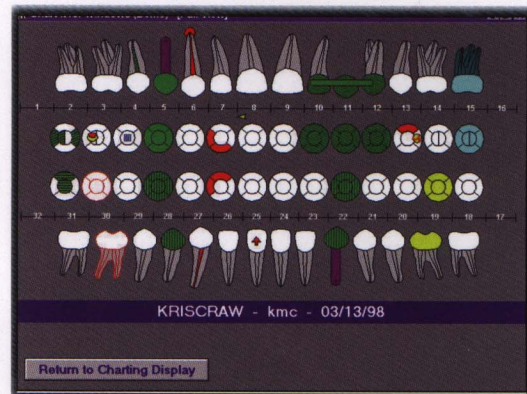

ELECTRONIC PROBES
Chart-It interfaces with the top electronic probes on the market, the Probe One (American Dental Technologies) and the Periotemp (Abredent).

OTHER OPTIONS
Also available are a light pen, keyboard, mouse and drawing tablet input devices.

INTERNATIONAL VERSION
Chart-It is also available in British and Canadian versions.

Periodontal chart (top) and Restorative chart (bottom)

System Requirements

While Chart-It works on most computers, we recommend at least an IBM compatible Pentium® processor with 16 MB of RAM and 100 MB of free disk space. Network requirements may differ. Your system will also require the following:

- SVGA (or better) monitor
- Operating System: Windows® 3.X or Windows 95
- Backup unit (recommended)
